EDUCATION

Veer Narmad South Gujarat University
Bachelor of Computer Applications

Surat, Gujarat
Aug 2021 - Mar 2024

WORK EXPERIENCE

BIGELEMENT INFOTECH

JR Frontend Engineer

Surat, Gujarat
June 2023 – Mar 2024

- Integrated third-party libraries and APIs seamlessly into the React application for enhanced functionality and user interaction
- Implemented efficient data fetching strategies, such as pagination and lazy loading, to handle large datasets seamlessly
- Optimized front-end performance by employing memoization techniques and virtualization to enhance rendering speed for extensive data sets
- Developed a highly reusable and configurable component library, employing design patterns Compound Components and Prop Drilling to faster modular and scalable UI development across the application

SOFTICES

Frontend Intern

Surat, Gujarat
Sep 2022– Jun 2023

- Successfully completed comprehensive training in React, covering fundamental concepts and progressing to advanced topics, including Hooks, Context API, and state management with Redux Toolkit.
- Acquired hands-on experience in React development, covering everything from creating responsive UIs to integrating external APIs and optimizing application performance.

PROJECTS

HEALTH GUARD PRO | React, Msal-auth, React-redux-toolkit-query, Typescript

- Handled millions of records with sophisticated data tables for an enhanced user experience.
- Initiated performance optimizations, reducing the website's loading time from 25s to 3-5s.
- Utilized React-Redux for state management and Ant Design for reusable, aesthetically pleasing components.
- The app has five different admin roles, and access to the website or app depends on the type of admin.

EVENT HUB | NextJS-14, Next-auth-V5, Typescript, Shadcn UI, Stripe, PostgreSQL

[Live](#) | [Github](#) | [Description](#)

- Proficient in NextAuth.js v5 for advanced authentication, including protected routes, ensuring secure user experiences.
- Skilled in NextAuth.js v5, implementing Two-Factor Authentication (2FA), password reset, and Gmail email verification for enhanced security.
- Experienced in PostgreSQL-backed event listing, enabling seamless management of events on user profiles.
- Proficient in Stripe payment integration and admin panel development for efficient ticket booking

AIRBNB | NextJS-14, Next-auth-V5, Typescript, Shadcn UI, MongoDB

[Live](#) | [Github](#) | [Description](#)

- Developed a full-stack web application using NextJS And server components
- Implemented Next-auth authentication with GitHub, Google, and credential providers
- handling all states using zustand and managing form data with react-hook-form
- Shadcn is a modern UI library used to build a reusable component across the application and use Tailwind CSS for stylings

ADDITIONAL

Languages: HTML/CSS3, JavaScript(ES6+), Typescript

Frameworks: Next.JS, React, Node.js

Developer Tools: Git, VS Code, Visual Studio, Azure DevOps

Libraries: Redux-Toolkit , Axios, React-Router-Dom(V6), Zustand, React-Hook-Form and many more

Spoken Language: English, Hindi, Gujarati
